

GGGGGAATCCCC

The image displays a DNA sequence: GGGGGAATCCCC. The bases are color-coded: G is yellow, A is green, T is red, and C is blue. Below the sequence, horizontal lines of corresponding colors represent base pairing. The first four G's are paired with C's (blue lines), the two A's are paired with T's (red lines), and the last four C's are paired with G's (yellow lines). The lines are slightly offset to show the pairing between adjacent base pairs.
